

AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph [0044] on page 2 of corresponding U.S. Patent Application Publication No. 20040267430 with the following rewritten paragraph:

[0044] As equation 4 indicates, $H_{cf}(f)$ is determined from $H(f)$. $H(f)$ is determined from the auto- and cross-spectral estimates of the source $x(\theta)$ and measured signals $y(\theta)_{bp}$. Specifically,

$$H(f) = \frac{G_{xx}(f)}{G_{yy}(f)}$$
